TLC connector is the new generation of TESA data transfer system, available in 3 versions: TLC-TWIN, TLC-USB and TLC-DIGIMATIC for wireless, USB and Digimatic connectivity, respectively. When mounted TLC connector replaces the battery cover allowing a compact design, avoiding cumbersome module hanging from the instrument. All TLC connectors enable two-way communication between the instrument and the PC:

- TLC-TWIN wireless transceiver connects TESA instruments equipped with TLC connector to PC via TWIN Station receiver. Each instrument with TLC-TWIN can be then managed from a PC, which allows communication with up to 48 instruments per TWIN Station !

- TLC-USB and TLC-DIGIMATIC data cables connect TESA instruments equipped with TLC connector to any USB interface and appropriate Digimatic interface.

The TESA utility is included in the delivery of the TLC connectors.

TLC-USB or TLC-DIGIMATIC cable * not included
