## SECTION 5: FIREFIGHTING MEASURES

### Extinguishing Media

Suitable extinguishing agents	Foam, Alcohol foam, CO2, Dry chemical, Water fog.
Unsuitable extinguishing agents	Water spray may be ineffective.
Special hazards arising from the substance or mixture	Closed containers may explode from internal pressure build-up when exposed to extreme heat and discharge contents. Liquid content of container will support combustion. Overexposure to decomposition products may cause a health hazard. Symptoms may not be readily apparent. Obtain medical attention. Hazardous decomposition products include carbon dioxide, carbon monoxide, and other toxic fumes.

### Special Fire Fighting Instructions

Water may be used to cool containers to prevent pressure build-up and explosion when exposed to extreme heat. Wear goggles and use self-contained breathing apparatus. If water is used, fog nozzles are preferred.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

### Personal precautions, protective equipment & emergency procedures

Avoid breathing vapors. Ventilate area. Remove all sources of ignition.

### Methods and materials for containment and cleaning up

Clean up with absorbent material and place in closed containers for disposal.

## SECTION 7: HANDLING AND STORAGE

### Handling

Precautions for safe handling	Do not puncture or incinerate (burn) cans. Do not stick pins, nails, or any other sharp objects into opening on top of can. Do not spray in eyes. Do not take internally. See product label for additional information.
-------------------------------	---

### Storage

Conditions for safe storage, including any incompatibilities	Store and use in cool, dry, well-ventilated areas. Do not store above 120 F.

## SECTION 8: EXPOSURE CONTROL AND PERSONAL PROTECTION

**Additional information about design of technical systems** - No further data; see item 7.

### Control parameters

Components with limit values that require monitoring at the workplace

Naphtha (Petroleum), Hydrotreated Light	64742-49-0
OSHA	TWA: 500 ppm PEL-Ceiling: Not determined
ACGIH	TLV-TWA: 400 ppm TLV-STEL: 500 ppm
Propane	74-98-6
OSHA	Not established
ACGIH TWA:	1000 ppm

**Appropriate engineering controls** Ventilation should be sufficient to prevent inhalation of any vapors. General dilution and/or local exhaust ventilation in volume to keep PEL/TLV of most hazardous ingredient below acceptable limit and Iel below stated limit.

### Exposure controls

#### Personal protective equipment

Eye / Face Protection		None under normal use. However, use of safety glasses with splash guards or full face shield should be used if indicated.
Hand Protection		<p><b>Protective Gloves</b></p> None under normal use. Use solvent-resistant for prolonged or repeated contact.
Respiratory Protection		None under normal use. Avoid breathing vapors. In restricted areas, use approved chemical/mechanical filters designed to remove a combination or particles and vapor. In confined areas, use an approved air-line respirator or hood. Self-contained breathing apparatus is required for vapor concentrations above PEL/TLV limits.
Other protective clothing or equipment		None under normal use. However, use of solvent-resistant aprons or other clothing is recommended. Eye washes and safety showers in the workplace are recommended.
